

## Personalised English Therapies

For English, there are personalised therapies and tests to support student progress in relation to different Assessment Objectives (AOs).

To determine the most suitable therapy for your child, refer to the percentage associated with each AO on the Pupil Progress report. Based on this percentage, choose a corresponding therapy from the table provided below. For example, if a student achieves 28% in AO1 on Paper 1 Language they should do the 1d Base Therapy. All therapies are accessible on our website, <https://www.tuxford-ac.org.uk/students/revision/>, in the section titled English. After completing a therapy, students should proceed to take the corresponding test.

We encourage your child to bring their work to be reviewed by Mr Alderson in E3 during break time or their teacher before progressing to the next level. Upon successfully completing a level, students can advance to the next tier.
